Course / Curriculum / Syllabus revision in compliance of NEP-2020 (B. Tech. / B. S.) with minors – 4 years duration

As per the Senate directives upon adoption of NEP-2020 in its 30th Senate, IIT Patna took up a rigorous curriculum and syllabus revision exercise for all the running programmes (in-campus / hybrid mode of instruction) to ensure implementation of NEP-2020. During the course of revision, renowned resource persons from the respective area of specialization were invited to contribute through their insights and experience on the subject matter. Their experience and inputs have been instrumental in shaping at par curriculum and course structure where every Academic Department, faculty members and Academic section of the Institute have taken keen interest and delivered their best to create the revised structure of the Academic programmes listed below.

Common curriculum for 4-year B. Tech. / B. S. with Minors and 5-year dual degree admitted through JoSAA

Sl. No.	Subject Code	SEMESTER I	L	T	P	C

The syllabus of each of the courses in the curriculum framework listed herein above is available on the following link for perusal by the Senate members a priori for discussion in the Senate. The syllabus structure is vetted by a committee comprising respective Department faculty members and external experts invited during review.

Note: 50% students will swap Physics with Chemistry (Sl. No. 3) and Engineering Graphics with Mechanical Fabrication (Sl. No. 4) and Electrical Sciences with Engineering Mechanics (Sl. No. 5) in semester 1 and 2, respectively.

(ii) B. Tech. in Electrical and Electronics Engineering (EEE)

Program Learning Objectives:	**Program Learning Outcomes:**
1. Develop a solid foundation in electrical and electronics engineering principles, including circuit analysis, electromagnetic field theory, electrical machines, power systems, control systems, power electronics, signal processing, and microprocessor/microcontroller systems. 2. Develop electrical and electronics project management skills, including the ability to plan, execute, and complete within specified timelines and budgets. 3. Work collaboratively in multidisciplinary teams, demonstrating effective teamwork and communication to solve complex engineering problems. 4. Recognize the importance of ongoing professional development, engaging in activities such as certifications, workshops, and conferences to stay updated of industry trends.	The graduates of this program will have 1. a successful career in an Academia/Industry/Entrepreneur 2. strong fundamentals in electrical and electronics engineering. 3. ability to design prototypes for real world problems related to electrical, electronics, and interdisciplinary fields. 4. ability to develop soft skills such as effective communications in both verbal and written forms, body language, time managements, problem-solving, leadership, work in both team as well as individual in a professional manner
Program Goal 1: Academic excellence by providing a curriculum that aligns with industry standards and encourages critical thinking in electrical and electronics engineering**.**	**Program Learning Outcome 1a:** Highly skilled market ready manpower to serve the emerging electrical and electronic sectors **Program Learning Outcome 1b:** Skilled Human resource to cater the needs of next generation power systems and EV technologies.
Program Goal 2: A culture of research and innovation by promoting faculty and student involvement in innovative projects in electrical and electronic technologies.	**Program Learning Outcome 2a:** Trained researchers for implementing research projects in line with national priorities such as Energy, EVs, Smart Grids, Green Technologies **Program Learning Outcome 2b:** Design and develop innovative smart technologies/products in energy and EVs as per the societal need
Program Goal 3: To design dynamic and flexible course structures for UG and PG programs as per the changing requirement of the industries	**Program Learning Outcome 3a:** Industry relevant UG, PG, and research programs **Program Learning Outcome 3b:** Trained manpower as per the industry requirement
Program Goal 4: To promote entrepreneurship among the students in the field of electrical and electronics engineering	**Program Learning Outcome 4a:** Realization of working prototype towards product development

	Program Learning Outcome 4b: Promotion of in-house technology-based ventures catering societal needs
Program Goal 5: Equip students with effective communication skills, enabling them to articulate technical concepts clearly and effectively in both written and oral forms.	**Program Learning Outcome 5a:** Manpower with enhanced soft skills to support the vision of developed India **Program Learning Outcome 5b:** Responsible citizen for the holistic growth of the country

(8.) B. Tech. Programme from the Department of Mechanical Engineering

(i) B. Tech. in Mechanical Engineering and Minor in Thermal Engineering

Program Learning Objectives:	**Program Learning Outcomes:**
Program Goal 1: Apply basic knowledge of engineering principles to solve technical problems applied to mechanical systems, stress and strain analysis of structures, design of machine elements, control systems to achieve desirable performance and to assess life of mechanical components.	Program Learning Outcome 1: The students should be able to apply the principles of Kinematics and Dynamics of Mechanisms, mechanics of solid, system dynamics and control to the engineering problems of societal relevance.
Program Goal 2: To impart the ability to model and analyse pertinent transport phenomena based on the fundamental conservations laws of thermodynamics and fluid mechanics.	Program Learning Outcome 2: Upon completion of the course, students will possess the capability to design and implement mathematical models and simulation tools specifically tailored to address complex mechanical engineering issues within crucial domains such as energy and the environment.
Program Goal 3: The graduates will be possessing the knowledge of concepts and practices of material removal, material forming, material joining, additive manufacturing-based processes, identify damage and failure of material to meet the present and future demands of the industry.	Program Learning Outcome 3: The students should gain the knowledge of the behaviour and processing of engineering materials through different conventional and state-of-the-art material subtractive and additive based processes.
Program Goal 4: To train the graduates with adequate engineering knowledge to develop skills for solving multi-disciplinary problems and achieving optimal results.	Program Learning Outcome 4: The graduates will be able to embrace leadership and collaborative roles for societal, environmental and economic enterprise.

(9.) B. Tech. Programme from the Department of Metallurgical and Materials Engineering

(i) B. Tech. in Metallurgical and Materials Engineering (MME) and Minor in MME

Program Learning Objectives:	Program Learning Outcomes:
Program Goal 1: The B.Tech program in Metallurgical and Materials Engineering aims to equip graduates with the necessary knowledge, skills, and values to succeed in professional careers related to metallurgical and materials engineering.	**Program Learning Outcome 1a:** Upon successful completion of the B.Tech program in Metallurgical and Materials Engineering, graduates will be able to identify, formulate, and analyse complex engineering problems related to metallurgical and materials engineering. **Program Learning Outcome 1b:** Students will be able to understand the science behind the functioning mechanism of metals, ceramics, polymers and glass
Program Goal 2: Apply fundamental principles of science and engineering to solve complex problems in metallurgical and materials engineering and cultivate critical thinking and problem-solving skills in students to address real-world challenges in the metallurgy and materials domain.	**Program Learning Outcome 2:** Student will be able to apply research-based knowledge and methodologies, including experimental design, data analysis, and interpretation, to investigate complex problems in metallurgical and material engineering. Graduates will be capable to carry out research work in their area of interest either in academic area or in industry.
Program Goal 3: Expose the students to the scientific and engineering concepts on metals, ceramics, polymer and composites and apply engineering principles to design, develop, and improve materials and processes for specific applications.	**Program Learning Outcome 3a:** Students will be well versed with the concepts of microscopic analysis, characterization techniques, metallurgical testing, polymer synthesis & analysis, nano & electro ceramics, plasma-coating and flash sintering, mineral beneficiation & process metallurgy. **Program Learning Outcome 3b:** Students will be able to design and develop new engineering materials with desired properties based on demands of various engineering sectors.
Program Goal 4: To impart hand-on exposure to modern laboratory equipment through structured laboratory experiments.	**Program Learning Outcome 4a:** Students will be able to correlate the theoretical concepts with the experiments and will be ready to apply the experimental knowledge in industries. **Program Learning Outcome 4b:** Students will be ready for quality control, higher studies and research work in the domain of metallurgical and materials engineering.

Program Goal 5: To inculcate research aptitude in the students and prepare the students to be industry-ready after the completion of their B. Tech. programme.	**Program Learning Outcome 5:** Students will be able to design solutions for complex engineering problems related to materials, considering public health, safety, cultural, societal, and environmental factors. In addition, apply ethical principles and commit to professional ethics and social responsibility as a metallurgical and materials engineer. Graduate will be able to launch start-ups as entrepreneur to create job opportunities in the country.

List of Interdisciplinary Electives

IDE I (Sem IV)
PH2290-Fundamentals of Electromagnetism
PH2291-Waves and Particles
EP2206-Fuel cell fundamentals

IDE II (Sem V)
PH3190- Mechanics in Physics
EP3106-Energy materials processing

IDE III (Sem VII)
PH4190 – Photovoltaics and Fuel Cell Technology
PH6190-Physics of complex systems
PH6191- Physics of Nanoscience
PH6192- Semiconductor Processing: An Interdisciplinary approach

MINOR COURSES FROM DEPARTMENT OF PHYSICS, IIT PATNA

Following three streams are offered as Minor:

1. Physics Minor
2. Nanoscience Minor
3. Optics Minor
4. Energy Storage Technology
5. Quantum Technology

Program Name: Physics Minor			
Paper Code	**Paper Name**	**Credit**	**Minor label**
EP2101	Quantum Physics	x-x-x-x	M I
EP2203	Electromagnetism		M II
EP3104	Solid state physics		M III
Relevant DE I- DE II			M IV
relevant DE III			M V
Program Name: Nanoscience Minor			
Paper Code	**Paper Name**	**Credit**	
EP2101	Quantum Physics	x-x-x-x	M I
EP2203	Electromagnetism		M II
EP3105	Instrumentation Techniques		M III
Relevant DE I and II			M IV
Relevant DE III			M V
Program Name: Optics Minor			
Paper Code	**Paper Name**	**Credit**	
EP2102	Optics and Lasers	x-x-x-x	M I
EP2203	Electromagnetism		M II
EP3105	Instrumentation Techniques		M III
Relevant DE I or DE II			M IV
Relevant DE III			M V

Program Name: Energy Storage Technology

Brief on Minor Program in "Energy Storage Technology"

Emergent issues of global significance comprising fast depleting fossil fuels reserve, carbon foot print, visible climate change, temperature rise and melting of glaciers causing sea level

rise are interrelated. These challenging issues are threatening sustainable growth and even survival of the planet earth.
To exercise an effective control well in time, therefore, requires "zero emission" culture and effective implementation of clean and green energy alternatives without any loss of time. This requirement has put pressing demand for development of newer clean energy technology on R&D institutions, its commercialization on industry, creation of talent pool in the area under demand by academic institutions and better industry-academia tie up in this emergent area. A positive signal has already become visible with faster adoption of electric vehicles (EVs) on road that is likely to emerge as a multiplicative technology market in near future.
Keeping this realistic fact in mind, the department of Physics has come up with a Minor program in "Energy Storage Technology". The course structure of this Minor program is herein below

1. Power Sources for Electric Vehicles (Code: PH/EP. , Credit : 3-0-0-3)
2. Fuel Cell Fundamentals (Code: PH/EP. , Credit : 3-0-0-3)
3. Photovoltaics: Concepts and Applications (Code: PH/EP. , Credit : 3-0-0-3)
4. Photovoltaic and Fuel Cell Technology (Code: PH/EP. , Credit : 3-0-0-3). This is to be listed as IDE also.

Paper Code	**Paper Name**	**Credit**	
EP2105	Photovoltaics: Concepts and Applications	x-x-x-x	M I
EP2206	Fuel cell fundamentals		M II
EP3106	Energy Materials Processing		M III
PH3238 /PH3239	Power Sources for Electric Vehicles / Fuel cell fundamentals		M II
Relevant DE III			M V
